

DATA SHEET

EASY PRINT SILVER FOAM BOARD

EASY PRINT SILVER FOAM BOARD is an expanded polystyrene core foam board with a unique combination that produces an exceptional product with outstanding qualities and benefits. The exterior face is a Silver UV Corona treated PET film suitable for all UV Flatbed printers and Screen Printing where consistency is of paramount importance, these boards are printed directly onto by large format digital print or screen print machines or may be used as a base on which to mount pre-printed posters.

AVAILABLE THICKNESS: 20mm, 10mm & 5mm

COMPOSITION:

SURFACE - Premium quality gloss finish has a Silver 350 GSM PET coating and is UV corona treated for a magnificent print quality finish. The surface is also PH neutral. It offers outstanding brightness, smoothness and stiffness, delivering reliability and efficiency in production, even through demanding printing applications. The face is 100% recyclable, non-biodegradable, contains no CFC's and contains a flame retardant additive to inhibit a zero spread of flame. The coated product is acceptable in the normal pre and post consumer waste stream.

CORE - Premium Australian made "M" grade expanded polystyrene and is manufactured completely CFC free. The light weight polystyrene core contains a flame-retardant additive to inhibit a zero spread of flame.

KEY BENEFITS - Why Choose EASY PRINT FOAM BOARDS?

Easy Print is the only "Australian Made" and manufactured foam board available in the market. Has an excellent reputation for great performance and consistent quality.
